Senior Full-stack
Laravel / React Native/ VueJS

We are looking for Junior ++ or Senior candidates who have a strong background in services development, with proven abilities to innovate and be creative.

Joining ACSO, you will be attached to Sofia Offices - you will be working with one of our developers, both dedicated 100% to our client, working directly with their development team. Our client is a startup based in France that provides a very smart and innovative application for eLearning purposes, based on Artificial Intelligence.

Requirements

Ideal candidates will have extensive experience with **Laravel** including object-oriented programming and front-end technologies **VueJS,** mobile **React Native** .

Candidates should be **Fluent in English**.

Candidates should be excellent team players, **capable of working remotely (in English),** motivated, good communication skills and adapting quickly to new technologies.

Experience

- + 3 years of experience and confirmed knowledge in Javascript
- Solid experience with JS frameworks or libraries (React.js, VueJS, React Native, Redux)
- Good experience on a PHP framework (Symfony / Laravel)
- Object-oriented development experience, familiarity with MVC design patterns
- Knowledge in CI / CD - API Design and RESTful Architecture
- Solid knowledge of HTML, CSS, JQuery, Javascript and Ajax would be a plus
- Familiarity with agile methods
- Knowledge in the different methods of access to BDD from Laravel / Node and WebSockets

Mission

- Design and implement a reliable and secure technology infrastructure
- Develop new features on the mobile app
- Participate in the gradual overhaul of the back office by improving ergonomics and UX
- Guarantee and maintain the quality of the product and the mobile application
- Integrate and maintain machine learning algorithms
- Manage the evolution of the project and be able to ensure deliveries on time
- Participate in the agile cycle of product development

Innovative technical environment:

- **Full Stack JavaScript - Mobile App**: React Native, Redux, React, Expo, Node, ES6, Pusher
- **PHP & Javascript - Backoffice**: Laravel, MySQL, VueJS, Vuex, Vuetify

We offer:

- FULL TIME position
- Competitive salaries with additional benefits
- Challenging work in a dynamic work environment
- Trainings to keep your knowledge up to date

Why Choose us ?

- Because we are in the center of Sofia,
- Because we are not a big and anonymous company, everybody knows the manager and talk to him.
- Because we value people and aim to build a relationship based on trust, in which everyone is important and part of the success of the company
- Because working with us is really cool :-)

All applications will be treated in the strictest of confidence.
Only short-listed candidates will be contacted.

Want to join our friendly and dynamic team?
